When did aviators show perseverance?

Sticky Knowledge:

Chronological understanding

- The first planes to fly in the past were bi-planes over 100 years ago. They have two sets of wings.
- The planes we fly today nearly all have one set of wings.

Historical enquiry

- We know about flight by looking at photos, videos and on the internet. Lots of pictures are black and white as it was a long time ago.

Historical interpretations

- I can use a book, video or photograph to help me share what I know about aviation.

Understanding of events, people and changes

- The Wright Brothers flew the first aeroplane successfully.
- Amelia Earhart was the first woman to fly across the Atlantic Ocean.
- Bessie Coleman was the first black woman to become an aviator.
- The Royal Air Force (RAF) fly planes to protect our country. There is a base in Naphill.
