Geography

The creation of a rainbow lends itself much to science but their appearance around the world holds just as much fascination from one country to the next. Look at these stunning photos of rainbows from around the world by clicking here: https://www.nationalgeographic.co.uk/landscape-photography/24-brilliant-pictures-rainbows-around-world

Then on the text that says 'VIEW GALLERY'.

Read where each photo was taken and colour that country on a world map.
