

Lots of things we see and use on the internet are safe, but there are things that are unsafe. We need to make sure we are aware of the risks when we're using the internet and keep ourselves safe!

Symbols are sometimes used to show what is safe (safety features) and what is unsafe (risks). Risks are usually colour coded in red; safety features are usually colour coded in green. E.g.

This risk symbol is a PEGI Rating 18.

This means the content is suitable for 18-year olds and over.

This safety feature symbol is a PEGI Rating U (Universal).

This means the content is suitable for everyone

You might see these symbols on computer or console games.

1. Log on to Purple Mash
2. Search for the game: Online Safety Game - 2DIY3D

Rules

In this game, the online risks and safety features are represented by symbols.

To win the game you need to collect all the safe symbols and avoid the risks.

How many safety features are there? Can you work out what the symbols mean?

How many risks are there? Can you work out what they mean?

Complete the table attached and submit your results to Google Classrooms!

Chili: Can you create some of your own symbols to represent risks and safety features? Add them to the table!

You can print this table out, or create your own! You might need to add some more rows as you go. Have fun!
